PowerSpool®

Ethernet Cable Holder and
Power Connection Point for
Guestroom Connectivity

PowerSpool® (TA-6200) Ethernet and Power Cable Holder for Wired Locations

The PowerSpool® HSIA Connection Kit provides a complete in-room connection kit in a single box making installation quick and easy. Each DeskHub® Connection Kit includes the connection point, cable, branding label, instruction card and holder and theft deterrent mounting pad. TeleAdapt HSIA Connection Kits takes the guess work out of purchasing, inventory and installation for both hotels and service providers.

The PowerSpool® is a dual purpose HSIA connection point providing both Internet access and power for a laptop. The PowerSpool® reduces the need for the guest to carry extra Ethernet and power cables. The retractable RJ45 reel and front power socket reduces cable clutter and helps eliminate lost and stolen cables. To minimize theft, the PowerSpool's rear RJ45 socket is recessed, making removal of the PowerSpool™ from the HSIA property infrastructure very difficult.

The DeskHub® line was created to provide recognizable connection points for guest HSIA, offer powerful property branding opportunities, streamline cabling requirements and leave a lasting impression with every guest and customer.

PowerSpool® Features and Benefits

- Creates a recognizable access point for HSIA
- Includes a retractable 80cm Ethernet cable for a secure high-speed and reliable connection
- 115 volt grounded power socket for all devices
- Solves cable management issues by eliminating cable clutter and lost Ethernet and power cables

DeskCard™ Advertise your HSIA Amenity

The DeskCard™ instruction card holder can be used to advertise and showcase property amenities, seasonal travel special, or display HSIA Wi-Fi and Ethernet guest login instructions. The DeskCard™ fits in the PowerSpool's rear card holder slot and can fit an instruction card up to 100 x 105mm.

DeskPlate™ Adhesive Foam Security Pad

TeleAdapt offers a more permanent solution with the DeskPlate™ adhesive foam line for securing the PowerSpool® to the guestroom desktop surface. The foam adhesive DeskPlate™ makes removal of the PowerSpool™ from the desktop very difficult without the use of tools.

DeviceSafe™ Security Cable

DeviceSafe™ CAT5e cables help deter theft by making the removal of the PowerSpool™ difficult. The unit end of the DeviceSafe™ cable is specially molded to prevent the PowerSpool™ from being unplugged, and the wall jack end has a special clip which mounts flush with the RJ45 wall plate.

PowerSpool® Technical Specifications

- Weight: 450 grams - Ethernet Retract 80cm
- Dimensions: 115 x 100 x 70mm
- Color: Textured Satin Black
- DeskCard™ Holder dimensions: 105 x 110mm
- DeviceSafe™ Cat5e Cable: 1.8M with recessed clips
- Base: Rubber Footed - Rear RJ45 socket recessed
