TA-7730 | MediaHub Active Extender™

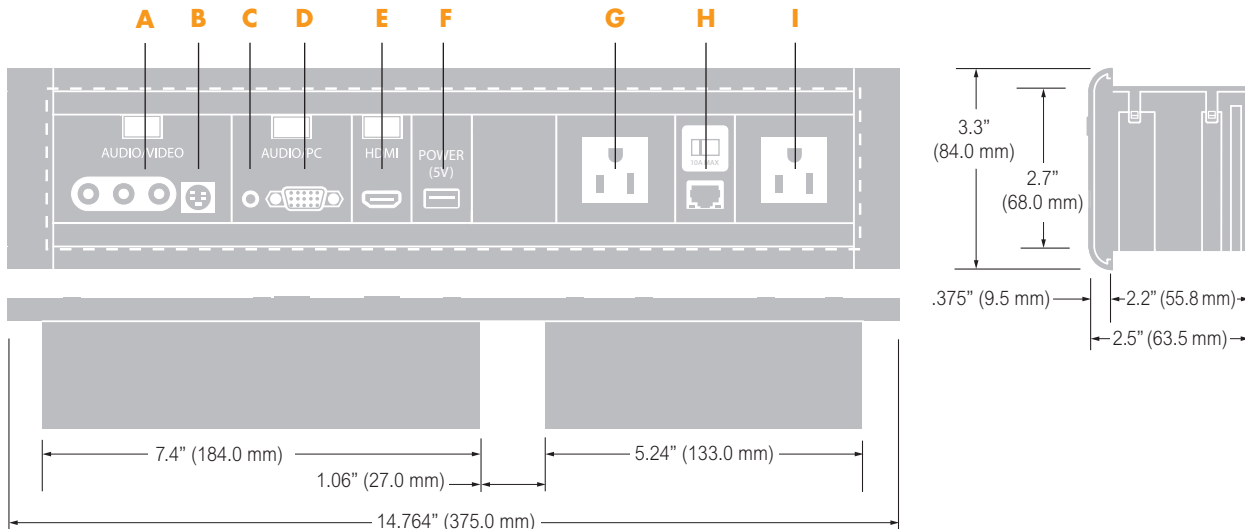

Auto-switching connectivity panel that allows guests to connect their portable electronic devices to the in-room TV or sound system. The TV automatically senses when a device is plugged in and automatically switches the TV to the correct channel. Guests can play their own movies, music and games, even business presentations on the big screen. The TA-7730 also provides guests with needed power outlets and a convenient Internet access point.

MediaHub Active Extender with optional desktop housing for easy installation on table or desk.

- All-in-one connectivity panel for your guest's electronic devices (such as laptops, digital cameras and video cameras, iPods®, iPhones®, game consoles and more)
- Fully integrated with a range of hospitality TVs to automatically sense first device plugged in and switch TV to the correct input (ask your representative for a list of compatible TVs)
- Senses last device plugged in and automatically switches to correct input, guest can use LED buttons to toggle between devices
- Provides guests with two easy-to-find power sockets, available in choice of US, UK or EU power sockets
- Gives guests wired Internet access through one convenient panel
- Attractive acrylic DeskCard provides guest user instructions
- USB 5V power socket lets guest charge portable devices
- Install as one extended unit or mount connectivity panel in one location and the power/Internet panel in another
- Prevents guests from tampering with existing TV connections

TA-7730 | MediaHub Active Extender™

Built for Commercial Use

MediaHub Active is a commercial connectivity panel, designed and built using quality materials to withstand daily use by hotel guests.

iPod/iPhone, MP3 Player or Laptop Audio

Guests can play their own music through the TV sound system using a standard audio jack to connect their devices to the panel.

Video Media

Guests can view video media from their laptop, camcorder, DVD player and any other device supported through VGA, composite AV, S-Video and HDMI.

Interactive Game Entertainment

Guests can connect game consoles to the TV through composite audio/video or HDMI connectors.

Auto-Switching

The MediaHub Active Extender is fully integrated with specific hospitality TVs to provide automatic input switching. It senses the first device plugged into the MediaHub Active Extender and automatically switches the TV to the correct input. It is totally seamless for the guest. Ask your TeleAdapt sales representative for a list of compatible TVs and VOD providers.

Auto-Sensing

MediaHub Active Extender senses the last device plugged in and switches to the correct input. Guests can toggle between devices with a push of the LED button above each port. Indicator lights show guests which input is active.

Multiple Mounting Options

MediaHub Active Extender can be mounted in a variety of ways. Flush mount the panel in the wall, or mount it on a desk or table with our optional desktop housing.

USB Charging

USB 5V power socket provides a convenient way for guests to charge their portable devices.
